## RACE STRAP - Team edition

Made with multiple layers, the straps guarantees a maximum of support and comfortability to make sure your next flight is the best one possible.

The padding not only helps to reduce the pressure felt during usage but is also stitched in a pattern that bends easily and adapts to every head-shape.

Each material has been chosen to increase the flying experience of all pilots.

- 3D Air Mesh provides a high level of support and a maximum comfortability.
- Upgraded stitching naturally pushes the battery outwards reducing pressure on the head.
- Soft edgetape to soften the touch and increasing the wearing experience.

This strap is available in two editions, the MCK edition and the Team edition.
